CLEANLINESS

IN PUBLIC SPACES

Enabling cleanliness is our strong point! We have successfully manufactured waste disposal containers and systems for public and semi-public spaces for over 80 years. During this time, in close association with our customers, we have developed a wide range of litter bins and containers adapted to market requirements.

SERVICE

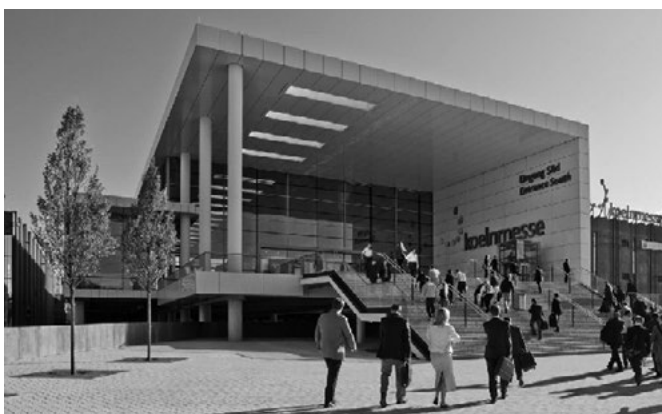

IN SHOPPING CENTRES

Give a good impression on the way to shopping centres. The surroundings of buildings strongly impact customers' impressions. Provide your customers with facilities so they can act environmentally friendly by introducing attractive and hygienic litter bins. Our clients include cities and local authorities and also largescale and individual commercial chains, which require consistent and good value container solutions for their subsidiaries.

UNIFORMITY

COMPANY PREMISES & TRANSPORT ENVIRONMENTS

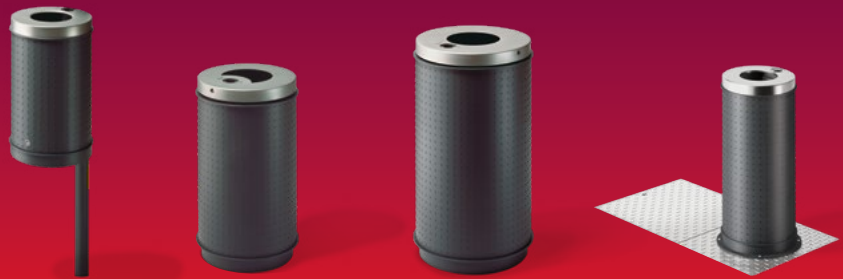

Company premises, trade fair grounds, transport infrastructure, tourism facilities and sports grounds all need to be clean. We can supply appropriate litter bins fitting your corporate appearance, which can be emptied very quickly.

Mini XXL is a system of large underground containers which can be combined with various insertion columns above ground.

For waste disposal with removal by suction, a separate flap allows optimum access to the underground container and prevents the creation of a vacuum. This enables a pleasant street scene environment in places where large amounts of litter occur. The space saved chiefly benefits pedestrians and cyclists. Incline adjustment of the column allows the installation in an area with an incline of up to 5°.

Options	Ashtray	Ashtray	Ashtray

"Drive In" is not a litter bin, it is a bin housing for a wheeled bin. Standard two-wheel 120, 240 and 360 litre plastic bins thus fit discreetly into their surroundings.
